

## FAST DELIVERY FOR RAPID SPINNAKER DEPLOYMENT

The spinnaker pole and its fittings lives a tough life. Things must go swiftly when the spinnaker are to be hoisted or lowered, and easily put away when trimming for a new course. It may get bruised, bumped or be exposed to unintended tensions. Worst case it breaks in

half. Then it nice to know that help is near. JM can deliver spinnaker poles for Yngling's as well as +60-foot boats. We have fittings and profiles on stock suitable for most boats.

### Spinnaker brackets

Item	Tube dim. mm	Weight	JM No.
<b>A</b> Pole end 25mm, plastic	25/21	35	03 25 001
