

# IT CAN HARDLY GET MORE SOLID AND FUNCTIONAL

A forestay must withstand some violent forces. When the wind howls across the deck and the boat thrusts through the waves while the helmsman requires tension on the forestay nearing the breaking point, a strong design is needed to keep things together.

Well, here it is. Or rather they. It goes without saying that Folkboats and X-55 yachts uses different sizes.

At first glance they do not look like a lot. But the inner reinforcement and the smart spectacles, which gives a choice between spinnaker and jib halyard, makes JM's forestay fixtures unique units, which handles the strains without complaining.

Item	Dim. Ø	JM No.
<b>A</b> Forestay fixture 150-165D		01 23 159
<b>B</b> Forestay fixture, complete	8 mm	01 61 260
<b>C</b> Forestay fixture w/o spectacles	8mm	01 61 261
<b>D</b> Forestay fixture, complete	12 mm	01 61 265
<b>E</b> Forestay fixture, w/o spectacles	12 mm	01 61 266
<b>F</b> Forestay fixture, complete	16 mm	01 61 270
<b>G</b> Forestay fixture, w/o spectacles	16 mm	01 61 271
<b>H</b> Forestay fixture, complete	22 mm	01 61 275
<b>I</b> Forestay fixture, complete	25 mm	01 61 277
<b>J</b> Forestay clamp (toggle)		10 02 103
